Personalized Exam Preparation Planner – UI/UX Case Study

Problem Statement

Many government exam aspirants struggle to create a proper study plan based on their preparation level. They often feel confused about where to start, what to study daily, and how to track their progress. Existing platforms provide content but not a clear daily roadmap for different preparation levels.

Solution

I designed a study planner that generates a daily study schedule based on the user's exam and preparation level (Beginner, Intermediate, Advanced). The app helps users track daily tasks, monitor progress, stay motivated, and upgrade to personalized coaching.

Target Users

- Government exam aspirants
- College students preparing for competitive exams
- Working professionals preparing for exams with limited time

Features of Your App

Feature	Description
Exam Selection	- User selects exam
Prep Level Selection	- Beginner / Intermediate / Advanced
Daily Study Plan	- Day-wise tasks
Progress Tracker	- Shows completion percentage
Motivational Quotes	- Encourages users
Pricing Plans	- Premium features
Contact & Support	- User feedback and help

User Flow

Home → Enter Details → Select Exam → Select Level → Daily Plan → Track Progress → Finish → Pricing → Contact

Tools Used

Tools Used: Figma (Wireframing, UI Design, Prototyping)

What I Learned

- I learned how to design a complete user flow
- I learned how to create interactive prototypes in Figma
- I learned about layout, spacing, and visual hierarchy
- I learned how to design pricing and progress tracking pages
- I learned how to maintain design consistency across screens

Future Improvements

- Add real progress tracking
- Add AI-generated study plans
- Add reminders and notifications
- Add mock test integration
- Add community discussion feature
